No one on base. A single to RIGHT field

Move towards the ball to back up RF

Move to back up an errant throw

Cover 3rd base

- The 2nd Baseman goes out as the cut-off man for the right fielder
- The shortstop goes to cover 2nd base and align the 2nd baseman between the RF and 2nd base by saying (for example): "RIGHT 1"...or... "LEFT 2"
- The RF should make a throw to the cut-off man (2nd Baseman) unless there is a play at 2nd base.
- The shortstop should tell the 2nd Baseman; "**CUT 2**" if he wants him to throw to 2nd base... OR ... **say NOTHING** if he DOES NOT want him to cut the ball off... OR ... "**CUT**" if he wants him to catch the ball and run it in to the infield.
- The 1st Baseman will take the position which is in line with the pitcher's mound, to the inside of 1st base and NOT in the base path. This will give the runner the illusion of having to make a wider turn around 1st base.
- Pitcher moves between 2nd and 3rd base to back up the Shortstop.

** The 2nd Baseman will be the cut-off man for any ball hit to the "right" of centre filed.

** If a ball is hit directly over 2nd base, or to the "left" of 2nd base the shortstop will be the cut-off man. Any ball that is in question the shortstop will be in charge of whom is the cut-off man. If the shortstop goes out to receive the cut-off, the 2nd Baseman will cover 2nd base.
